The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they include the following reference sign(s) not mentioned in the description: 310 (Figure 9). A proposed drawing correction, corrected drawings, or amendment to the specification to add the reference sign(s) in the description, are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

Also, it appears that Figure 8 is a view of a bow test rig, rather than a bow.

Claims 1-19 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

It is not clear what is meant by "wedge-like"; this term is not defined in the specification.

\* \* \* \* \*

Claims 1 & 5-10 are rejected under 35 U.S.C. 102(e) as being anticipated by Sims 6,298,842.

Sims shows an archery bow dampening device, made of an elastomer and having a base portion 44 and extension portion 52 suspended from the base; as shown in figure 16, the

extension portion may have tapered extremities, so it may be said to be "wedge-like"; just what is meant by "wedge-like" is not clear from the specification.
